

The House Mill is the largest remaining Tidal Mill in the World. It is a Grade 1 listed 18th century mill in London's East End and owned and managed by the River Lea tidal Mill Trust (RLTMT). The Trust is seeking to recruit new trustee members with the relevant skills and/or experience to help take it through the next stage in its development.

The Trust has been awarded a Heritage Lottery Fund development grant and is progressing its plans to restore the mill, create a sustainable visitor attraction and generate hydro-electricity combining 18C through to 21C technologies.

We would particularly welcome applicants with experience in Business Management, Education, Funding, Law and Marketing.

Apply with C.V. and covering letter to:
